Stalwart Green Global International
Global Implementation Strategy

The SGG business strategy is multi-faceted and addresses the needs of the market from a holistic solutions approach. We create each project as an end to end real estate solution. This business strategy was designed with the goal of “Building Capacity for Sustainable Delivery”.

The components of our program include:

- Project Financing
- Development Standards
- Alternative Energy
- Installation
- Product Sourcing
- Education
- Project Design
- Design Build Specifications
- Site Delivery
- Project Certification
- Product Distribution
- Sales & Marketing

We accomplish the programming through a team approach with global partners that bring their products, technology, government affairs and business relationships to form a total solution.

2.2 Existing Market Developments

use local, regional and National Builders
